

AX5000 is NSF 60 certified and safe to use in **ALL** water systems including drinking water.

Ingredients: Purified Water (H₂O) (97.00%), Sodium Chloride (NaCl) (2.50%), Sodium Hypochlorite (NaOCl) (0.50%)

Storage: Store at room temperature away from direct sunlight and heat. **DO NOT ALLOW TO FREEZE** because product may lose its potency. After use, seal or close dispenser.

Stability: See below for date of expiration.

Disposal: No special disposal requirements. AX5000 is biodegradable and environmentally friendly.

Directions for use: Maximum dosage 690 ppm; 0.069%; 690 mg/L

AX5000 is formulated for use in all drinking water systems. When used in conjunction with a primary disinfectant, AX5000 simultaneously restores chlorine residuals and reduces disinfection by-products by removing the organic and inorganic deposits that react with chlorine and chloramines.

AX5000 is a nonhazardous, liquid formulation that works online in conjunction with or without a corrosion or scale inhibitor. AX5000 maintains its performance integrity without changing water corrosivity. By controlling the dosing rate, potential harmful deposits can be removed slowly without having adverse effects on water quality.

Water treatment with AX5000 also improves overall water quality. These results extend system and equipment life and improve overall system performance.
