

a system approach to keeping athletes healthy

The AQUAOX™ Infection Control System is a comprehensive system approach for implementing more effective, time efficient, healthier and environmentally friendlier cleaning and disinfecting strategies without adding unwanted substances to the environment or otherwise causing harm to athletes, staff, equipment and facilities.

Solutions

AQUAOX™'S EPA registered Electrochemical Activation solutions are non-toxic, non- corrosive, biodegradable, safe-to-use, fast-acting, healthcare-grade cleaners and disinfectants. These solutions safely clean and destroy pathogens, viruses, algae, and fungi on all types of sports and exercise equipment and personal protective safety equipment.

Cleaner

- Streak-less cleaning agent.
 - Odorless. No surfactants or suds added.
 - Equivalent efficacy to a 2% NAOH-solution, with only 160 ppm strength.
 - Effective against gram negative bacteria.
- 1 gallon/128 oz. (6.5”x6.5”x6.5” 9 lbs.)
4 gallons per case (13”x13”x13”, 38 lbs.)

Disinfectant

- Ready-to-use Broad Spectrum Hospital Disinfectant.
 - Fast-acting, residue-free, non-toxic disinfectant.
 - Salmonella enterica, Staphylococcus aureus, Swine influenza Virus and more.
- 1 gallon/128 oz. (6.5”x6.5”x6.5, 9 lbs.)
4 gallons per case (13”x13”x13”, 38 lbs.)
5 gallon Bag-in-box w/spigot (11.75”x11.75”x12”,45 lbs.)

Electrostatic Sprayer

The AQUAOX™ Infection Control System uses air-assisted electrostatic sprayers to apply its EPA-registered disinfecting solutions to quickly decontaminate and disinfect entire mat areas, difficult to reach spaces, and high-traffic areas that require frequent treatment. Electrostatic spraying provides a superior spray coverage compared to conventional sprayers by providing an electrical charge to the solutions, giving them a wrap around, effective and even coverage. Tests have demonstrated up to 10 times better coverage resulting in reduced manpower costs and reducing the threat of disease-causing microorganisms.

Cordless Electrostatic Hand Sprayer

Includes:

- Lightweight and portable – 3.8 lbs.
- 16.8 V lithium-ion battery allows 4 hours of continuous run time.
- 3 in 1 adjustable nozzle for different particle sizes.
- Quite – suitable for use in any environment.
- Removable tank holds 33.8 oz. of liquid.
- Deluxe carrying case
- Battery charger
- Nozzle wrench

Applicators

AQUAOX™'S High performance, certified, hospital-grade microfiber products and proprietary applicators quickly cleans, traps and remove 99.99% of bacteria from mats, sports equipment and most other athletic surfaces. Several studies have determined that microfiber is better than cotton at capturing bacteria. The University of California, Davis Medical Center compared the number of bacteria picked up by a cotton-loop mop and by a microfiber mop. The cotton-loop mop reduced bacteria on the floors by 30%, whereas the microfiber mop reduced bacteria by 99%.

Sprekler Handle w/Integrated Reservoir

- Unique aluminum mop handle w/integrated reservoir
- Precise dosed amount of solutions
- No more lugging buckets
- Excellent mobility
- Quick & easy to use

Composition: Aluminum

Dimension: 57"

Weight: ± 16 oz.

Ergoball 3-part Handle

- Lightweight
- Telescoping handle accommodates various heights and tasks
- Ball grip for ergonomic movement
- Hand support for an optimal grip

Composition: Aluminum Dimension:

24.8" – 59"

Weight: ± 12.3 oz.

Flatmop Frame w/locking coupling

- Locking coupling for multi-functional use.
- Lightweight, high strength aluminum construction
- Low profile to reach under low objects
- Easy to clean

Composition: Aluminum, ABS plastic

Dimension: 15.7" x 3.5"

Weight: ± 10 oz.

Multimop

- Large cleaning capacity
- Inner foam material to prevent drying too quickly
- Velcro backing for quick & easy changing
- Multiple color tabs for color-coded cleaning
- Loop handle for No-touch removal

Composition: 80% microfiber, 20% polyester

Dimensions: 17.7" x 4.7"

Weight: ± .17 oz.

Original Microfiber Cloth

- Durable, ultimate quality microfiber cloth
- Unique cleaning and power and absorbency
- Can absorb six times its own weight
- Strong sewn edge finish so that cloths do not shrink
- Multiple colors for color-coded use

Composition: 100% microfiber

Dimension 15.7" x 15.7"

Weight: ± .11 oz.

Spray Bottles

- Product label
- Durable HDPE bottle
- 3-finger trigger for comfort
- Adjustable nozzle

Composition: HDPE, Polypropylene

Capacity: 16 Oz.

Weight: \pm 2.45 oz.
