Part Number: AX-5000-V1.1

Lot #: _____

Production Date: _____

Aquaox™ Sanitizer » Disinfectant is an effective, multi-purpose sanitizer and disinfectant. It is an all-purpose disinfectant solution for hard, non-porous surfaces, an all-purpose sanitizing solution for food contact surfaces and a source of highly efficient chlorine for water-treatment.

DIRECTIONS FOR USE:

TO SANITIZE AND DISINFECT (DRINKING) WATER

Prepare a 5 ppm free available chlorine solution by adding one teaspoon of product to one gallon of drinking water. For typical water treatment, add product to drinking water to obtain a >0.5 ppm free available chlorine residual measured at the end of the water distribution system. A >0.5 ppm free available chlorine residual in water eradicates waterborne bacteria and slows down and controls the growth of odor and slime producing micro-organisms.

TO CLEAN AND DISINFECT HARD, NON-POROUS SURFACES

Prepare a >200 ppm free available chlorine solution by adding 3/4 cup of product to one gallon of drinking water. (For heavily soiled surfaces, pre-clean with Aquaox™ Cleaner 112 or Aquaox™ HD Cleaner 122). Apply, Wipe, Spray or Dip >200 ppm free available chlorine solution product on microfiber cloth and wipe surface clean. Allow solutions to contact surface for 10 minutes and air dry to eradicate all bacteria. For toilets, flush, pour product into bowl, brush bowl with scrub brush and let stand for 10 minutes. Flush.

TO CLEAN AND SANITIZE FOOD CONTACT SURFACES

Prepare a <200 ppm free available chlorine solution by adding 1/2 cup of product to one gallon of drinking water. (For heavily soiled surfaces, pre-clean with Aquaox™ Cleaner 112 or Aquaox™ HD Cleaner 122). Apply, Wipe, Spray, or Dip <200 ppm free available chlorine solution on microfiber cloth and wipe surface clean. Allow solution to contact surface for 2 minutes and air dry to eradicate all bacteria.

FIRST AID

Call a poison control center or doctor for treatment advice. Have the product container or label with you when calling a poison control center, doctor or going for treatment. You may also contact the National Pesticide Information Center (NPIC) 1-800-858-7378 for emergency medical treatment information.

If in eyes: Hold eye open and rinse slowly and gently with water for 15 – 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

TO WASH, RINSE AND SANITIZE FRUIT, VEGETABLES AND SEEDS

Prepare a <50 ppm free available chlorine solution by adding 3 tablespoons of product to one gallon of drinking water. Thoroughly clean all fruit, vegetables and seeds. To sanitize, wash and rinse for 10 seconds with <50 ppm free available chlorine solution.

TO WASH, RINSE AND SANITIZE HANDS

Prepare a <25 ppm free available chlorine solution by adding one tablespoon of product to one gallon of drinking water. Thoroughly clean hands with water and soap. To sanitize, wash and rinse for 10 seconds with <25 ppm free available chlorine solution. Dry hands with clean paper towel or let air dry.

READ MANUFACTURER'S INSTRUCTIONS FOR SPECIFIC DIRECTIONS OF USE.

STORAGE AND DISPOSAL

Store at room temperature away from direct sunlight and heat. **DO NOT ALLOW TO FREEZE** because product may lose its potency. After use, seal or close dispenser before disposal. No special disposal requirements. Aquaox™ Sanitizer » Disinfectant is eco-friendly.

PRECAUTIONARY STATEMENTS

Physical or chemical Hazards: Aquaox™ Sanitizer » Disinfectant is not compatible with other chemicals such as acids and hydrogen peroxide.

CAUTION

Full-strength product causes moderate eye irritation. Avoid contact with eyes. Personal Protective Equipment not necessary, but good manufacturing practice recommends the use of safety glasses and gloves when handling this product. Wash thoroughly with soap and water after handling and before eating and drinking.
