

On-site Generator

fast, easy & ecological

The KECA system is an innovative on-site Electrochemical Activation technology that produces high volumes of powerful, ready-to-use, eco-friendly sanitizing solutions on demand.

KECA quickly and efficiently provides all the solutions you need to safely sanitize any high demand environment. The easy-to-use control panel allows you to pre-program the amount of solutions produced or you can hygienically turn on and off generation by a simple wave of your hand.

The compact, lightweight design allows the unit to be used standing on a countertop or wall mounted when space is limited.

Activate and stop with a wave of a hand for hygienic, no - touch operation

Adjustable, continuous generation from 1 to 50 gallons

MODEL

| | |
|---------------------------------|------------------------------------|
| Dimensions | KECA 50 11.8"x6.4"x15.2" |
| Weight | 13 lbs. |
| Power rating | AC 110V 50/60 Hz |
| Rated current | 1.0A |
| Water Supply | Operating pressure Temperature |
| | 14.5 ~ 108 psi 41 ~ 95° F |
| Quantity of generated water | 3 quart / min. |
| Continuously generated quantity | 132 gallons |
| FAC | 50 (± 10) ppm |
| ph | 5.0 ~ 6.5 |
